DigestSea

THE SOLUTION
TO IMPROVE DIGESTIVE FUNCTION

Strengths

- Digestive stimulation
- Improves digestive and renal functions
- Protects the liver

Why?

Digestive tract dysfunctions (steatosis, liver congestion, other hepatic diseases) or renal dysfunction decrease zootechnical performance and shorten animals' lifespan.

DigestSea is recommended in case of indigestion and lowered appetite. It prevents heat stress and oxidative stress.

DigestSea optimizes digestion

Anti-hyperlipidemia Marine Sulfated Polysaccharides (MSP) from algae improve lipid metabolism.

DigestSea formulation increases enzymatic and salivary secretions, protects the liver and generally stimulates drainage (diuretic activity).

Directions for use

For pigs, poultry and ruminants:

Use 3 to 5 days according to stage and age:

- Young animals:
0,5 mL / liter / day or for 10 kg of live weight/ day
- Growing and breeding animals:
0,5 to 1 mL / liter / day or for 10 kg of live weight/ day
- Layer:
0,3 mL / liter / day

Aquaculture

Consult your veterinarian.

Cans of 1 and 5 liters
