

Searup

REINFORCES NATURAL DEFENSES

Strengths

- Supports vaccination programs
- Improves resistance to stress
- Reinforces natural defenses

Why?

The immune system is constantly facing aggressions from the environment (vaccination programs, stress, mycotoxins...). Moreover young animals often encounter a lack of immunity. In these conditions, animals become more susceptible to microbial infections, thus reinforcing the need for an efficient immune system.

Searup supports immunity

Searup combines the action of immune-modulating Marine Sulfated Polysaccharides (MSP), vitamins and amino acids. Immune-modulating MSP contribute to a better immune response thanks to the activation of specific receptors of the innate immune system. Searup is recommended during stressing periods and in support of vaccination programs.

Searup Spark

Directions for use

- 1 to 2 spark according to quantity of water used and physiological stage
- Use for 3 to 5 days

Aquaculture
Consult your veterinarian.

Box of 10 spark 80 g
Box of 24 spark 45 g
Box of 30 spark 16 g

Searup Still

Directions for use

- 0,5 to 1 mL / liter of water / day according to the physiological stage, or for 10 kg of live weight / day
- Use for 3 to 5 days

Aquaculture
Consult your veterinarian.

Cans of 1 and 5 liters
